## Working to enable global settlement of G-secs: Das

The governor said as part of the road map for the gradual restoration of the variable rate reverse repo (VRRR) based as the main operation under the revised liquidity management framework, RBI will conduct "fine-tuning operations" from time to time as needed. This will be aimed

at facilitating the process of markets settling down to regular timings and functioning and the normalisation of liquidity operations. The process will help manage uncertainty in the on and off liquidity flows so that liquid conditions in the system evolve in a balanced and evenly distributed manner, Das said.

He emphasised the need to develop a yield curve that is liquid across tenors, observing that secondary market liquidity, as measured by turnover ratio, is found to be relatively

low on several occasions. It also tends to remain concentrated in a few securities and tenors. "The yield curve accordingly displays kinks, reflecting liquidity premium commanded by select securities or tenors. To a certain extent, this is a result of the market microstructure in India, dominated as it is by the buy-and-hold and long-only investors," Das said.

The governor said liquidity in the g-sec markets tends to dry up during periods of rising interest rates or in times of

uncertainty. While the market for special repo facilitates borrowing of securities, it is worthwhile to consider other alternatives that ensure adequate supply of securities to the market across the full spectrum of maturities, Das said.

He referred to past discussions on the introduction of securities lending and borrowing mechanism (SLBM). They were held with a view to augmenting the market liquidity by incentivising buy-and-hold-type investors such as insurance companies and

pension funds to make available their securities to other market participants. Das urged for a continuation of discussions on the matter as part of overall market development.

Das said this is an opportune time to consider new instruments to facilitate hedging of long-term interest rate and reinvestment risk by market participants such as insurance companies, provident and pension funds and corporates. "The interest rate derivatives (IRD) market has

developed over the years with the availability of a wide range of products. The only major liquid product, however, continues to be the Mumbai Interbank Offer Rate (MIBOR) and the Overnight Indexed Swaps (OIS) market," Das said, adding, "Participation in the IRD markets is also largely limited to foreign banks, private sector banks and primary dealers."

On this regard, he appreciated RBI's efforts in formulating operational guidelines for trade in swaptions, which has now commenced.

"On its part, the Reserve Bank of India will endeavour to ensure adequate liquidity in the g-sec market as an integral element of its effort to maintain comfortable liquidity conditions in the system," Das said.

## Sensex breaches 57K, Nifty tops 17K as bulls take over

The market capitalisation of BSE-listed companies jumped to an all-time high of ₹2,50,02,04,01 crore at close of trade.

It took the Sensex just two sessions to climb from the 56,000 closing level to the 57,000 mark.

Nifty extended its winning streak for the seventh day, rallying 201.25 points or 1.19% to an all-time closing peak of 17,132.20. It touched an intra-day record of 17,153.50.

Arti Hartel was the top gainer in the Sensex pack, rallying 6.99%, a day after its chairman, Sumit Bharti Mittal indicated raising tariffs.

## SC: Supertech's twin towers to be razed

Uplodging the 2014 order of the Allahabad High Court that ordered demolition of the illegal construction, a bench comprising justices DY Chandrachud and MR Shah accepted the HC's findings that the sanction given to the two towers by the Noida Authority in 2009 was illegal. The towers violated fire safety norms, national building code and minimum distance requirement between individual buildings as well as the owner's obligation to provide gardens and to residents of the housing society.

The judges said the approval to the two towers was a result of "collusion" between Noida civic authorities and the real estate company. The court made no effort to ensure compliance of the UP Apartments Act 2010, as a result of which the rights of the flat purchasers have been brazenly violated. This cannot point to any conclusion, other than the collusion between Noida civic authorities and the real estate company. The court made no effort to ensure compliance of the UP Apartments Act 2010, as a result of which the rights of the flat purchasers have been brazenly violated. This cannot point to any conclusion, other than the collusion between Noida civic authorities and the real estate company.

Coming down heavily on the officials of Noida and Supertech, the top court said the builder had raised false pleas and attempted to mislead the court, while the officials of Noida Authority had not acted bona fide in the discharge of their duties. Supertech "has stooped to the point of producing a fabricated sanctioned plan, therefore, we confirm the directions of the High Court for sanctioning prosecution" against the officials of the builder and Noida Authority.

The two 40-floor towers to be demolished has a total of 915 apartments and 21 shops, of which 633 flats were booked by homebuyers. The Emerald Court House has 15 other towers, fully built with residential flats.

Unfortunately, the diverse and unseen group of flat buyers suffers the impact of the unholy nexus between builders and planners. Their quality of life is affected the most. Yet, confronted with the economic and social consequences and the might of legal authority wielded by planning bodies, the few who raise their voices have to pursue a long and expensive battle for rights with little certainty of outcome. They are the victims of misinformation and victims of misinformation. Hence, the law must step in to protect their legitimate concerns, Justice Chandrachud said.
